Art Unit: 1616

ACKNOWLEDGMENTS

1. The Examiner acknowledges receipt of the amendment filed 12/19/03 wherein the specification was amended; claims 1-84 were canceled; and claims 85 and 86 were added.

Note: Claims 85 and 86 are pending.

APPLICANT'S INVENTION

2. Applicant's invention is directed to a method of radiotherapy as set forth in independent claim 85.

DOUBLE PATENTING REJECTIONS

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

Art Unit: 1616

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 85 and 86 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,699,458. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are directed to a method of radiotherapy wherein a metal-ligand complex is administered to a subject. The claims differ in that the instant invention includes a third compound (formula Ic) that is not present in the patented invention. Hence, the skilled practitioner in the art would recognize that species encompassed by formulae Ia and Ib are encompassed in the patented invention.

112 REJECTIONS

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 85 and 86 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1616

Claims 85 and 86: The claims as written are ambiguous because it is unclear what 'thiol-protecting group' Applicant is referring to in the claims (i.e., see independent claim 85, line 14). Applicant is respectfully requested to clarify the claim in order that one may readily know what is encompassed by the instant invention.

Claim 86: The claim as written is ambiguous because it is unclear whether Applicant intended to add more text since there is no period at the end of the claim.

SPECIFICATION

7. The disclosure is objected to because of the following informalities: on page 3, lines 4 and 6, there are markings on the page. Applicant is requested to submit a clean copy.

Appropriate correction is required.

COMMENTS/NOTES
